

Available Capacities:

9,500 / 12,000 / 18,000 / 20,000 BTU

With its newly improved design, the 4 Way Cassette brings sophistication and provides clean air while adding a sense of class to your interior. Not only is this unit attractively designed, it also uses advanced technologies to optimize your comfort in any environment. Feel the power and enjoy the beauty with the new 4 Way Cassette.

Simple Display

The simple display design with its rounded corners adds a neat and tidy feeling to your interior.

Neat and Clean Design

The 4 Way Cassette uses a new, neat and clean design. The completely hermetic blade structure keeps the indoor unit clean preventing dust or other foreign substances from entering the unit. The internal parts of the indoor unit are also out of sight when the blade is shut, improving the unit's appearance.

Features

Wide Blade

NO! Dust

High Lift-up

Sub Duct

Fresh Air

Light yet Robust Design

Samsung's 4 Way Cassette indoor unit is now lighter in weight at 37.5lbs. It is the lightest of its type in the industry, about 35% lighter than our competitor's 4-way cassette.

No Overflowing Drain Water

The check valve on the drain pump prevents drained water from flowing backward into the drain pan. This minimizes the the drain pan's water level so that you will never have to worry about water stagnation or overflowing drain water that could drip into your interior.

ONE-WAY FLOW

CLEAN CEILING

NO OVERFLOW

NO STAGNATION

Easy Leveling

Each corner portion of the panel is detachable: this makes it easier for you to adjust the height, and makes installation and leveling much simpler and quicker.

Individual Blade Control

By using remote controller, the opening angles of the 4 blades can be individually set at the same or different angles within a 32°~65° range for more efficient cooling.

Fan Speed Adjustment for High Ceiling

The optimum fan speed for high ceiling can be achieved just by using the remote controller without adjusting the DIP switch on the indoor unit's PCB. The fan speed adjustment function provides evenly cool and warm air throughout spaces with high ceiling of up to 11.5ft.

High Ceiling Mode

The high ceiling mode allows indoor units to provide even more powerful airflow throughout your space. This mode enlarges the coverage area of the airflow up to a height of 15ft.

Easy Blade Cleaning

Samsung's 4 Way Cassette indoor units have detachable air flow blades so you don't need to remove the entire panel to clean the blades.

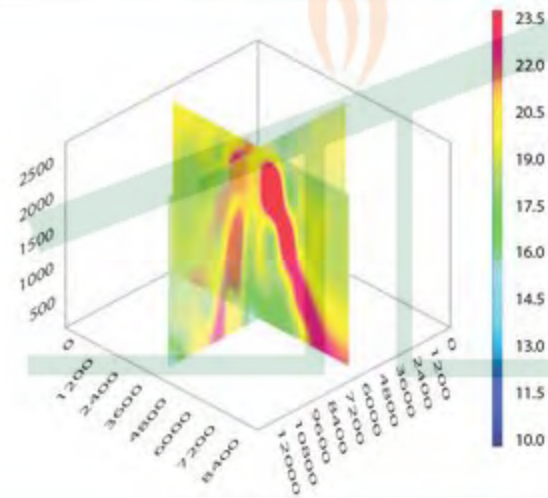

Quick Cooling and Heating

Samsung's 4 Way Cassette indoor unit achieves the desired set temperature much faster than our competitor's products.

4Way Cassette

Conventional

Surround Air Flow

The 4 Way outlet can cool every portion of your room. The new and practical design of the blades minimizes blind spots at the corners of the panel, and can almost cover a full 360° around the indoor unit.

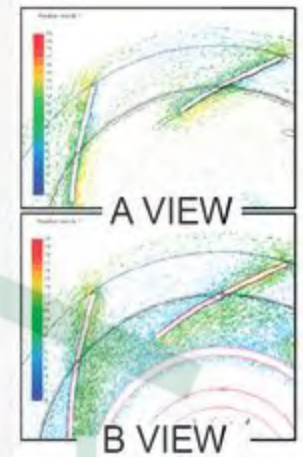

Turbo Fan

1. Silent Operation

Imagine a room of cool calmness. The aerodynamically designed Turbo Fan minimizes noise from the turbulence of the blade movement, meaning our units make less noise than conventional models.

2. Uniform Distribution

The Turbo Fan with wide blades provides extreme cooling and heating power from 4 separate outlets so the entire room cools down or warms up faster. This unit can extend comfort to every nook and cranny of the room.

Feature Details

Powerful Airflow

Wide Blade

Wide blades in the indoor unit deliver cool or warm air at greater distances to provide even cooling and heating throughout the room.

Ceiling Dust Prevention

No! Dust

The newly designed panel will control air direction in a way to avoid contact with the ceiling. This new design will prevent dust from accumulating on the ceiling after long periods of operation, keeping your interior space cleaner than ever.

High Lift-up Drain Pump

High Lift-up

The lift-up drain pump lifts condensed water up to 29.5 compared to our competitor's limit of 27.5, allowing for more flexible and convenient installation.

Fresh Air Intake

Fresh Air

Fresh air can enter through the cassette unit so that you can enjoy even fresher air in your room.

Sub Duct

Sub Duct

Sub Duct enables you to use the same air conditioner unit to cool an additional smaller space nearby. (A cassette unit is fitted with a knockout component to accommodate for this.)
